Geekster

Projects

MODELLING AND FABRICATION OF MULTI PURPOSE FERTILIZER SPRAYER(ACADEMIC PROJECT)

It's main usage is to sprayer the fertilizer in multiple ways. Mostly people uses sprayer in single way manner. But where comes to this here we can sprayer in three multiple ways like Ground level, Middle level, Top level.

USER LOG IN

Here I acquired to create User Log info by the use of HTML and CSS.

It place a key role after the login itself the User can access the all the information about the company or work profile and also by the CSS I used to styling to be attractive manner

RESPONSIVE NAV BAR

A Responsive Nav bar is a UI element that links the website's different sections and collapses the menu element according to the screen size. Youth Creativity it is main to build this website to jobseeker will be more helpful.

Awards

Best Academic project award 2024

Bandi Ramesh babu (principal)

I feel very glad to announce that I got a best Academic project award around 35 project. I got selected i.e Multi purpose fertilizer sprayer it will help many farmers can sparay the fertilizer with out the help of his backbone. Because many farmers were seen used to hold that sprayers and spray the fertilizer. But by our project they will not get strain and finally feel happy.

Internship

SKILL DESIRE

I have done internship by the Skill Desire here I learn't how to do modelling and drafting to outcome product.

I used to do designing to the product which look in good to see and also at the end of the product design.

I used to do finate element analysis by this we can check any error or any slack are obtain by this i used to resolve it.

Professional Experience

Hero Honda Showroom Guntakal

I completed Industrial training upto 6 months in the role of trainee

Their I used do analysis about the machining parts and the components.

I used to assemble all the engine in a constant manner.

I used to recheck the engine parts whether it gets assemble properly or not.
